Experience

Professional Software Development Trainee | Qalam it Program

Full Stack Developer (MERN)

February 2026- July 2026

- Developed and maintained **3+ full-stack web application modules** using **MongoDB, Express.js, React.js, and Node.js**, improving functionality and user experience.
- Implemented **RESTful APIs**, optimized database queries to improve system performance, and reduced response times by **approximately 30%**.
- Delivered **3+ project features** and resolved **20+ frontend and backend issues** through debugging, testing, and performance optimization.

Projects

DineHub – Restaurant Reservation & Food Ordering System (Group Project)

Role: Backend & Database Developer

- **Developed** the backend for a restaurant reservation and food ordering system using **Node.js, Express.js, MongoDB, and Mongoose** in a **4-member team**.
- **Designed and implemented 5+ MongoDB collections** with Mongoose schemas, defining relationships for users, restaurants, menus, carts, orders, reservations, and reviews.
- **Built 25+ RESTful APIs** for authentication, restaurant management, menu management, food ordering, reservations, and customer reviews with **JWT-based role authentication**.
- **Implemented** complete order, reservation, and review workflows, enabling secure CRUD operations and seamless interaction between customers, restaurant owners, and administrators.

VELNIX – Full Stack E-commerce Website

- Developed a **full-stack e-commerce application** using **React.js, Node.js, Express.js, MongoDB, Mongoose, and Tailwind CSS**.
- Implemented **JWT authentication, OTP verification, role-based authorization, and secure RESTful APIs**.
- Built core e-commerce features including **product management, shopping cart, Wishlist, checkout, order management, and product reviews**.
- Designed responsive **buyer and seller dashboards** with **profile management, analytics, and CRUD functionality**.

Teacher Student Management System

- **Developed** a full-stack Teacher Student Management System where teachers can securely sign up, log in, add students, and manage student records through an intuitive dashboard.
- **Implemented** email notification functionality and RESTful APIs using Node.js, Express.js, and MongoDB, automatically sending emails to newly added students while enabling teachers to view and manage student lists efficiently.

Smart Expense Tracker (Final Year Project)

- **Developed the** backend of a Smart Expense Tracker using **Node.js, Express.js, and MongoDB**, implementing secure RESTful APIs for managing users and expense records.
- **Designed** database schemas and integrated CRUD operations, enabling efficient expense tracking and reliable data storage while improving application performance.

Education

Government College University, University of Faisalabad

Bachelor of Computer Science

2021-2025
